

Avocado Oil Powder

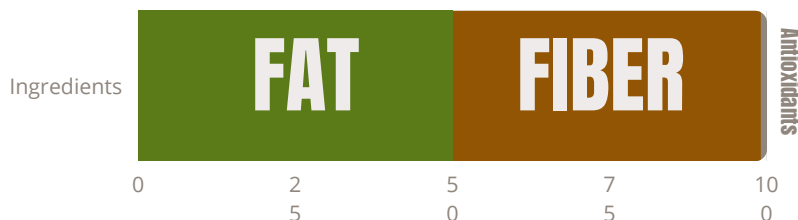

ZERØCARB™, 50% FAT LOAD

Vegan fat powder that provides Omega 7 & 9

Our Avocado oil powder is a vegan fat powder with a 50% oil load, based upon our refined Avocado oil. The Avocado oil comes from South Africa and is spray dried with (Prebiotic) Acacia Fibers. The powder is part of our ZerøCarb™ range and intended for dry formulations like Diet foods, Sports nutrition, Meal Shakes and can also be used in bakery type applications.

Avocados are high-fat vegetables that have been popular in (traditional) kitchens for generations. The last decades, the popularity of avocados in western economies has risen based upon the perceived health benefits. The oil is rich in monounsaturated fatty acids like oleic acid (Omega 9) and palmitoleic acid (Omega 7) that both play an important role in human health. The fat powder we have developed makes it possible to use this nutritional oil in dry formats.

The off-white powder has a neutral taste & smell and gives a free flowing texture. It can be applied in dry applications that need a source of functional fat and/or fibers. It perfectly fits into high fat/low carb diets

Currently no official EU health claims are allowed.

Avocado oil powder is available in bulk and private label formulations fitting your needs. It is often used in Diet foods, Sports nutrition and Meal Shakes.

Guaranteed safety, quality and consistency by your trusted supplier Lus Health ingredients. Find out more at lusingredients.com or email us at info@lusingredients.com
