

Flaxseed Oil Powder

50% FAT LOAD

Vegan fat powder that provides Omega 3

Our Flax seed oil powder is a vegan fat powder with a 50% oil load, based upon our refined Flax seed oil. The flax is grown in Europe and is spray dried with (Prebiotic) Acacia Fibers. The powder is intended for dry formulations like Diet foods, Sports nutrition, Meal Shakes and can also be used in bakery type applications

Flaxseeds are rich in polyunsaturated fatty acids of which Alpha linolenic acid (ALA) is the most abundant, also known as one of the **Omega-3 fatty acids**. The body can convert ALA into eicosapentaenoic acid (EPA) and to a lesser extent docosahexaenoic acid (DHA).

ALA has different benefits related to health, such as lowering blood sugar levels, supporting healthy cholesterol levels and heart health and helping in protection against high blood pressure.

The off-white powder has a neutral taste & smell and gives a free flowing texture. It can be applied in dry applications that need a source of functional fat and/or fibers. It perfectly fits into high fat/low carb diets

Multiple Health claims possible, reach out for more information

Flaxseed oil powder is available in bulk and private label formulations fitting your needs. It is often used in Diet foods, Sports nutrition and Meal Shakes
