

Canola Oil Powder

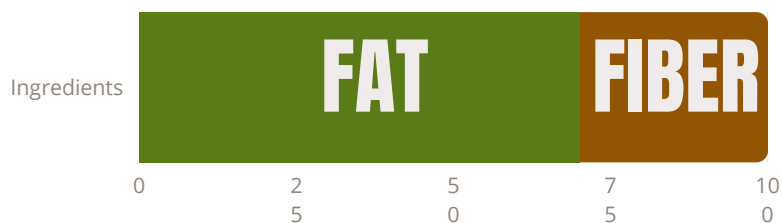

ZERØCARB™, 70% FAT LOAD

Vegan fat powder that provides Omega 3,6 & 9

Our Canola oil powder is a vegan fat powder with a 70% oil load, based upon refined Canola oil, AKA Rapeseed oil. The oil is spray dried with (Prebiotic) Acacia Fibers. The powder is part of our ZerøCarb™ range and intended for dry formulations like Diet foods, Sports nutrition, Meal (replacement) Shakes and can also be used in more general food products like bakery, pasta and bars.

Canola oil powder is rich in Oleic acid (Omega 9), Linoleic acid (Omega 6) and Alpha Linolenic (Omega 3), and can be used to nutritionally enrich products with these fatty acids. We recommend to do so diligently and create a good balance of Omega 3 to 6 when implementing.

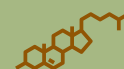

The off-white powder has a slight Canola oil taste & smell and gives a free flowing texture. It can be applied in dry applications that need a source of functional fat and/or fibers. It perfectly fits into high fat/low carb diets

*An Official EU health claim on lowering cholesterol is allowed
Original scientific papers are available freely upon request*

Canola oil powder is available in bulk and in private label formulations fitting your needs.

Guaranteed safety, quality and consistency by your trusted supplier Lus Health ingredients. Find out more at lusingredients.com or email us info@lusingredients.com

CHARACTERISTICS

CHOLESTEROL

ALA contribute to maintenance of normal blood LDL-cholesterol concentrations

MEAL REPLACEMENT SHAKE

Meal replacement shakes are becoming even more popular. To match the law ALA needs to be in. What better way than a vegan input?

BALANCE IS KEY

Official health claims are indeed allowed on ALA, Oleic acid and Linoleic acid. We strongly recommend to balance also with Omega 3 fatty acids as the typical western diet contains already a lot of Omega 6.

PRIVATE LABEL

Canola oil powder is also available as Private Label and in a formulated product!

Ask for the possibilities.
